Essay Responses for MATH221010 for 2021 Sum (2215) - Instructor Hayes, Daniel

Question ID: 1117

Additional Comments:

Responses (5 of 26)

Dan was an excellent instructor who was supportive of our studying and receptive to questions. I emailed him multiple times throughout the course and he was very responsive, almost always he had gotten back to me within the hour. He also is very helpful during office hours and had no issues spending as little as 5 minutes or the whole hour helping me with issues.

Professor Dan was one of the best professors I have ever had. I have always been poor at math and he made Calculus seem easier than what I expected.

Daniel Hayes is by far the BEST math professor I have ever had. I used to be abysmal at math, but how he broke down topics and explained them to me helped me realize that math can actually be quite useful and honestly fun at times!

For a calculus class, he did an excellent job actually explaining topics and always willing to help anyone without bringing them down. Overall one of my favorite teachers I've had!
